EDUCATION

Capitol University
Bachelor of Science In Information
Technology
2016-2020

Liceo De Cagayan University
High School
High School Department
2012 - 2016

SKILLS

- Full-stack development
- HTML, CSS, JQuery,
  JavaScript and AJAX
- MySQL
- Visual Basic .NET
- PHP programming
- PYTHON programming

ABOUT ME

I am an entry-level software developer who knows how to build websites and simple programs. I have experience with PHP, JavaScript, HTML, CSS, Bootstrap, and Visual Basic .NET. I also know a little bit of Python and am currently studying it to learn more. I focus on writing clean and easy-to-understand code and am actively practicing to improve in this area. I am excited to join a team, solve problems, and keep learning new things to get better at what I do.

EXPERIENCE

AL-Amanah Trust Multi Purpose Cooperative
Freelance   2022 - 2023

- During my freelance work as a full-stack developer from 2022 to 2023, I worked on two projects. The first project, the ATMPC Pharmacy Inventory System, is finished and helps manage pharmacy products. The second project, the ATMPC Advertising Web Application, is still being worked on. This project is being made to help manage online ads for both the front-end and back-end development, ensuring seamless integration and functionality to meet the clients' needs.
  - **ATMPC PHARMACY INVENTORY SYSTEM TECH USED**
    - **VB.NET**
    - **MYSQL**
  - **ATMPC WEB APPLICATION TECH USED**
    - **Vanilla PHP**
    - **JQuery**
    - **Javascript**
    - **Ajax**
    - **HTML**
    - **CSS**
    - **BOOTSTRAP5**

Software Developer Intern   2020 - 2020

National Telecommunication Region X Licensing System

- I worked on a system called the Licensing System. At first, all the work was done by hand. During my year as a Software Developer intern, my boss asked me to look at how the system worked and find a faster way to do things. I made a new plan that helped the system work faster and easier, so people could finish their tasks quickly and without mistakes.
